

QUICKER CHANGE OF GRAVURE ROLLS

- Faster roll exchange for more efficient maintenance, cleaning and production flexibility
- One change cart for take-up and transport of both rolls
- Optional for new gravure roll coaters as well as retrofittable in existing aggregates
- Reduction of changing time from usually 3 hours to approx. 20 minutes for one roll or 30 minutes for both rolls

ADVANTAGES

- Always the optimum gravure configuration for faster changes of the coating quantity
- Less machine downtime - maintenance and cleaning of the rolls outside of the machine
- Easy and quick roll handling with forklift or chain hoist beside the machine

FEATURES

- Integrated roll guiding unit, for lateral withdrawal
- External cart for roll change and roll transport
- All connections, such as hoses, drives, pneumatic and electrical components, will be disconnected via quick couplings
- Changing time: approx. 20 minutes for one roll or 30 minutes for both rolls
